

BRACTON®

Increased dosage rates for deep cleaning.

BRACTON® BEER LINE CLEANING SYSTEM

Time for an Upgrade!

As the industry extends time periods between their beer line cleans and the varied depth of craft beer on tap. The ability to run our Bracton DP1 and DP2 or the award winning Craft Beer Line Cleaner is here!

The new system allows for an easy hassle free deep clean to assist with those hard to remove build ups in your lines.

Safe to use for you and your staff without compromising the taste of your beer.

1

SAVE TIME & LABOUR

No need to batch mix

2

SAVE CHEMICAL WASTAGE

The system only mixes what is required

3

SAFETY

No direct contact with concentrated chemicals

Discover the Power of Bracton Beer Line Cleaning System

Tailored specifically for Bracton Craft (non-hazardous cleaner), Twin Beer Line and DP1 and DP2 Beer Line Cleaning solutions, our cutting-edge equipment is setting the standard for excellence in beer system hygiene. With craft beer trends rising, it is important to necessitate a meticulous deep clean to rid the lines of hoppy residue and haze. Trusted by installers, with over 10,000 installations across Australia.

The Benefits

Some key benefits of single and dual pump systems:

Precision Cleaning with up to 20% Dosing System

- Ensuring a thorough clean for your beer system, in addition, the WA4210 features a dual dosing system.
- Refer to your chemical drum for specifics on dosing ratios, guaranteeing optimal results.

Efficient Water-Driven Pump Operation

- Providing efficiency with a water-driven pump.
- Using the power of water, the system eliminates the need for electricity, reducing energy consumption.

Minimising the Risk of Chemical Handling

- Safety first, it is crucial in minimising the danger associated with hand mixing hazardous and dangerous chemicals.
- Ultimately, it is paramount to protect your staff and work establishment.

Reliable Performance: Precise Dosing Every Time

- Peace of mind, knowing Bracton Beer Line Cleaning System provides accurate and precise dosing each time.
- Removes the uncertainty and guesswork from the cleaning process, delivering consistent and reliable performance every time.
